Irritating to skin, eye and respiratory system.
Very toxic to aquatic organisms.

Potential Health Effects

- **Inhalation**: May cause irritation of the respiratory tract. May cause alcohol intolerance.
- **Ingestion**: Harmful if swallowed! May cause alcohol intolerance (Antabuse Effect). May cause headache, dizziness, nausea, vomiting and gastrointestinal irritation.
Skin contact  May cause an allergic skin reaction. May cause a rash and itching of the skin. May cause skin defatting with prolonged exposure.

Eye Contact  May cause eye irritation. Signs/symptoms can include redness, swelling, pain and tearing.

### 4. EMERGENCY FIRST AID PROCEDURES

**Inhalation**  Remove person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, get immediate medical attention.

**Ingestion**  If swallowed, call a physician immediately. Only induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person.

**Skin**  Remove contaminated clothing, wash skin with water, using soap if available. Remove contaminated clothing and launder before reuse. Seek medical attention if irritation persists or toxicity occurs.

**Eyes**  In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention if irritation persists.

**Note to Physician**  Provide symptomatic/supportive care as necessary. Exposure by ingestion, inhalation or skin absorption may cause alcohol intolerance (Antabuse Effect)

- **Special Protective Equipment**  Fire fighters should wear full protective clothing, including self-contained breathing equipment.
- **Unusual Fire and Explosion Hazards**  Toxic emissions may result if product is involved in a fire. May form flammable air/dust mixtures. $K_{st} = 168$ bar.m/s. Minimum Ignition Energy (MIE) = <3 mJ.
6. ACCIDENTAL RELEASE MEASURES

Procedures
Wear protective equipment specified. Avoid the generation of dust. Sweep, vacuum, or shovel and place into closable container for disposal.

Clean up Methods
Isolate area and remove sources of friction, impact, heat, low level electrical current, and RF energy. Isolate spill and stop leak where safe. Sweep up and remove solids. Do NOT spread spilled product with water.

7. HANDLING AND STORAGE

Handling
Good hygienic practices should be observed. Work clothes should be washed separately at the end of each work day. Disposable clothing should be discarded with material. Avoid generating or breathing dust. Avoid contact with eyes, skin and clothing. Close containers of unused product. Wash hands before eating, drinking, and chewing gum, using tobacco or using the toilet. Do not reuse this container.

Storage
Store closed containers in a cool, dry, well-ventilated area. Store away from strong oxidizing materials. Avoid exposure to direct sunlight.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls
Avoid dust generation. Ensure good ventilation and local exhaustion of the working area as necessary to control any air contaminants to within their exposure limit. Adequate ventilation should be provided to keep dust concentrations below acceptable exposure limits. Discharge from the ventilation system should comply with the applicable air pollutions control regulations. Eliminate ignition sources.
